EDUCATION

University of Texas at Austin – Austin, Texas

Bachelor of Natural Science in Computer Science

May 2027

- GPA: 3.87
- *Relevant Coursework:* Computer Organization and Architecture, Algorithms, Data Structures, Principles of Operating Systems, Game Programming Paradigms, Game Technology, Computer Graphics, 3-D Game Development Capstone

EXPERIENCE

Texas Inventionworks (TIW) – Austin, Texas

Student Associate

January 2024 – Present

- Mentored hundreds of students in operating advanced machinery: 3D printers, laser cutters, soldering, and machining, and hand tools. Translating complex technical processes into approachable instruction and expanding the pool of proficient engineers at UT.

Executive Team Member (Infrastructure Development)

May 2025 – May 2026

- Drive student innovation and staff efficiency at Texas Inventionworks by architecting an inventory and purchasing system from the ground up, coordinating cross-functional partnerships with UT organizations, and leading weekly Fab Fridays, generating involvement for hundreds of students and dozens of daily tracked sales.

Amazon Web Services Head Database Manager

August 2024 – May 2025

- Built and led a team using enhanced AWS infrastructure to manage training and machine data - balancing technical depth with clear communication. Resulting in improved backend efficiency, accurate and accessible equipment training information tracking for 60 staff members accessing over 5000 students records daily.

Unicom Engineering – Plano, Texas

Junior Developer Intern

June 2026 – August 2026

- Rebuilt server hardware test suite by replacing 2,500+ lines of legacy bash scripting with a modular Python/JSON framework (a few hundred lines), migrating 6 core tests and adding automated HTML/text reporting that cut engineers' test review time by over 90%.

Cockrell School of Engineering Software Development Summer Internship – Austin, Texas

Full Stack Developer and Architect

June 2024 – August 2024

- Took ownership of a complex, multi-endpoint full stack system, independently problem-solving, applying self-taught AWS skills, and delivering a reliable solution that greatly improved 60 staff users' efficiency in verifying and modifying training data for over 5,000 students across dozens of equipment training courses daily.

ACTIVITIES

University of Texas at Austin, Robo Rumble – Austin, Texas

Jan 2024 – Present

Team Co-lead and Driver

- Co-led a team through every stage of combat robotics, from early design decisions and iterative prototyping to manufacturing and competing in a double-elimination bracket, applying systematic problem-solving and creative engineering to build a competitive beetle-weight (3 lb.) robot. Placing 10th and later 4th overall.

University of Texas at Austin, Robotics Minor – Austin, Texas

August 2024 – Present

- Pursue a multi-disciplinary robotics minor to complement CS coursework, engaging in hands-on projects that require synthesizing knowledge across mechanical, and software domains to design advanced robotics solutions.

SKILLS

Amazon Web Services (AWS)

- Lambda, Amplify, DynamoDB, IAM, Secrets Manager, AWS AppSync, CloudWatch Logs, API Gateway

Technical Skills

- Python, C++, C#, C, Java, AI-Assisted Development, Unreal Engine, Godot Engine, Gitlab/GitHub/Git, OpenGL, Object-Oriented Programming, Microcontrollers, VS Code, JetBrains Rider, REST APIs, Linux, Hardware Testing, Technical Documentation, Onshape CAD, FDM/SLA 3D Printing, Soldering, Laser Cutting, Machining, Hand Tools
